DETAILED ACTION

1. This action is responsive to the amendment received 9/5/06. Claims 1-2, 5-7, 9-14, and 16 were amended. Claims 21-27 were added. Accordingly claims 1-2, 5-7, 9-14, 16, and 21-27 are pending.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2, drawn to a network system in which when a radio terminal enters a radio area of the radio base station, it is configured to transmit the request message after receiving the notification message via the first interface of a plurality of interfaces, classified in class 709, subclass 239.
 - II. Claims 5-7, 9-14, 16, 21-27, drawn to a packet transmission network in which an IP packet is encapsulated, encapsulated and protocol processing is performed on a first sub-network on behalf of the radio terminal, classified in class 709, subclass 230.
3. The inventions are distinct, each from the other because of the following reasons:
4. A telephone call was made to Mr. Monaco Reg. No. 52,041 on 11/23/06 to request an oral election to the above restriction requirement, but did not result in an election being made.
5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 2155

6. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

7. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Asad M. Nawaz whose telephone number is (571) 272-3988. The examiner can normally be reached on M-F 8-4:30.

10. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Saleh Najjar can be reached on (571) 272-4006. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
